

Hey, before we completely restructure the Secret Foundation, I had an idea.

Interday Secret Network communities have expenses, I think that's unquestionable, whether it's travel, accommodation, etc.

Not to mention the unquestionable work of the people who are leading these communities, giving talks and increasing Secret Network adoption whether in local media ( YouTube etc ) or at live events.

Personally, I think that these activities should not go unnoticed, so I suggest in the future to create a DAO ( members will be representatives of the various international communities ) which would receive for the being 0.05% Community tax, similar to the Secret Foundation

This would currently mean approximately 1500 SCRT per month → 1125\$

I guess you all understand that the goal is not to employ 10 or more people, the goal is to cover costs and possibly at least a little incentivize the hard work of the SCRT community, the amount should remain very low for now, if in the future the SCRT community will be satisfied with the work of this "organization" there is a possibility of increasing it

Due to the level of funding, I recommend to involve a maximum of 5 communities.

Funds can be used for new concepts like community t-shirts or stickers ( SCRT stickers are really lacking a lot, among the cryptocurrency community it's a really cheap and effective way to raise awareness of the project )

Personally, I would like to discuss this proposal and later include it as part of the Secret Foundation restructure.

I would be very happy for any ideas, insights or objections, I believe this can greatly benefit the Secret Network community in the long run.
