

Introducing Viridian Ecosystem Actors (the “Group”)

- The Group consists of ecosystem actors the Viridian Allocator Advisor as well as service based partners.
- This Group proposes to continue to work in partnership and provide advice & support for the development of the RWA roadmap for MakerDAO.
- And build on the learnings to date from RWA projects, in particular MIP65 which has led to the implementation of the James Asset Trust (JAT) structure , facilitated the largest RWA allocation for MakerDAO and added a significant revenue driver for the protocol.

AREAS of FOCUS

We are experiencing pivotal times for the crypto industry, with increasing regulatory oversight, institutional adoption/competition and blurring of the lines between DeFi and TradFi ecosystems.

Our immediate focus areas are to support enhancements to the James Asset Trust (JAT) structure for this evolving market reality;

- JAT Structural enhancements (ie onboarding of new payments & exchange service providers for operational resilience)
- Legal & Regulatory - JAT legal structure maintenance and regulatory review of alternative Trust jurisdictions
- Process Automation & migration of components of the structure “On-Chain”, explore Tokenization options.
- Pipeline development for new arrangers & allocation opportunities (as determined via the Stability scope framework)
- Support MakerDao Endgame organizational restructuring process

Our Values

- Humility

: We relish the challenge of building at the intersection of DeFi & TradFi with no real rule book to follow and learning in the process !

- Passionate

: About Financial Markets & DeFi, and being part of the journey to build a better Financial system on-chain.

- Result Driven

: We work through the challenges and remain focussed on delivering value for the Maker protocol and community.
