

Continuing the discussion from [Introducing Impact Estimations](#):

Want to make a signal request, declaration of intent or MIP proposal?

NO.

As a newcomer/freshman, I want to learn more about the tags system. But hard to find resource.

For almost every governance polls and some of executive votes, they are marked by tags like “high/medium/low impacts”.

1. Could you please tell me the specific meaning of all the tags?
2. How can i know the history of tags (When/why introduces tags?)
3. Who can mark and adjust the tags?
4. How to determine the tags for each proposal?

I guess there should be a lot discussion in the early days. But I am sure at this moment, I can't find them. Or at least, I don't know which keywords should I use. Please, comment and help!
