

Rabbithole Grant Bi-Weekly Update #7

Date: March 06, 2023

I. Executive Summary:

Rabbithole was funded with 100K ARB to develop the infrastructure and deploy [Quests](#) on behalf of GMX.

RabbitHole received its initial 25K ARB grant from the GMX Grant multisig on December 11, 2023.

On February 6, 2024 RabbitHole initiated the transfer of the second funding tranche of 25K ARB.

To date, Rabbithole has created 32 quests on behalf of GMX's STIP grant and 1 quest with an NFT Reward for RabbitHole's Holiday Quest. RabbitHole has driven significant traffic to Arbitrum using quests. RabbitHole network performance has performed dramatically, including the protocol as one of Arbitrum's top contracts in January

The program has been paused until further notice.

a) Roadmap Progress

- Development of the GMX plugin (i.e. GMX integration on Rabbithole) was completed prior to receiving the grant, in the weeks leading up to December 12, 2023.
- December 12, 2023: Rabbithole received 25K/100K ARB from GMX.
- December 12, 2023: Began development of a [Dune Dashboard](#) for the GMX community to use in tracking the effectiveness of the granted ARB.
- December 12, 2023: RabbitHole announces first Quests on Twitter.
- January 20, 2024: RabbitHole launches support for [GMX V2 Perpetual Swaps](#).
- February 26, 2024: RabbitHole reaches next milestone.

RabbitHole has continued to refine its GMX quests to support GMX V2 exclusive quests, in addition to further development towards perpetual swap plugin support and "Open Position" action types. We have launched a [Conquest Campaign](#) driving 219 users who had used Optimism, but not GMX, in the last 90 days to GMX to trade.

- Our analysts have launched Open Position quests allowing for consistent quest completion rates around 1.5 ARB per quest reward. We will continue to adapt our reward rate according to market conditions.

b) Milestone/KPI Achievements

Target Objectives

Objective

Description

KPI

Objective #1

Drive new users to GMX and create sustainable ecosystem growth. We'll use allowlist targeting functionality such as whitelist/blacklist to accomplish this objective.

7,500 new wallets

Objective #2

Drive incremental usage to GMX by engaging existing users and reactivating dormant ones.

27,500 monthly unique wallets, 8,500 re-engaged wallets, 85,000 transactions driven to GMX

Objective #3

Provide GMX a detailed CPA (cost per action) & fees generated for each quest as well as the overall program to measure efficacy of the effort.

Dune Dashboard

Objective #4

Create a GMX Plugin to deploy quests to specify minimum amounts and specific tokens, which can be used by anyone in GMX community
