

# Chains & Networks

One of the first questions you might have is whether Dynamic supports the chain/networks you need. The answer is generally yes! Dynamic supports a wide range of chains and networks, and we're constantly adding more.

If you don't see the chain/network you need and it's not EVM compatible, just [let us know](#) !

Below is a list of the supported chains/networks, but you can also view them more visually in the [dashboard](#) :

## 1. EVM:

We support all EVM networks. You can currently turn on the following via the dashboard (simply go to the [configurations page](#) in your dashboard and flip the toggle). For any not mentioned below, you can easily add them manually using [our evmNetworks prop](#) . \* Arbitrum \* Aurora \* Avalanche C chain \* BNB Smart Chain \* Base \* Berachain \* Celo \* Chiliz \* Cronos \* EON \* Ethereum \* Fantom \* Gnosis \* Moonbeam \* Optimism \* Palm \* Polygon \* Scroll \* Zora \* zkSync

1. Solana
2. Bitcoin
3. Flow
4. StarkNet
5. Cosmos
6. Algorand
