

In case I missed anything, is there an official date for auto migration from AAVE 2 to AAVE 3?

My understanding is in case of auto migration, AAVE 2 users don't need to resolve any of their lending and borrowing on AAVE 2, all the smart contracts will be transferred to AAVE 3 seamlessly. And users don't need to do anything

I think there is a real potential risk of error in coding and user losing funds. In this case it will cause AAVE users to panic if they can't reach out to anyone to help them
