Nomination Statement

I am running for Apecoin Special Council to provide a voice for the degenerate crypto community who wishes to preserve web3 ideals.

Motivation

The core of Yuga Labs is the community. We have seen the trust with the team slowly fade as communication and operations trend towards a “web2 type” imbalance of power. I wish to mend this waning bond by being a voice who does not push their ideas on others, instead engages Apecoin holders to participate in discussion.

Rationale

I am aware my professional experience is not up to par in order to earn a place on the council. What I can tell you with confidence is the fact that I have paid attention to every single project, market sentiment, innovative mechanic, etc. that the NFT space has had and I understand NFT market psychology better than almost anyone. I care about the NFT space, I study the market daily because I love the technology and community, not for the profit. I spent a large percentage of my net worth at the time on a charity NFT to attend a Yuga Labs Charity dinner in 2021 after the first Apefest. I did this to meet heroes of mine who were early adopters of technology and identified Yuga Labs as something special early on. Apecoin has always been one of my largest areas of conviction as I studied every aspect of the coin upon launch. People in the NFT space who have followed me know my obsession with the coin analyzing the unlock schedule, staking statistics, and much more.

I know if people hear my passion about Apecoin they will want me as a representative voice for our community.

Specifications

Community Manager to ZachXBT's Santa Swap (Secret Santa NFT Project)

Metaverse Headquarters: MVP award for contributing useful insights and helping other community members

Suolo Rose: Founder of the private community

Concluding Statement

Yuga Labs was built on top of its unbelievable community. We need to foster effective lines of communication to the Apecoin community through the lens of a degenerate trader. I will be the medium to communicate to those who truly built the entire NFT and crypto space. If we lose the degenerates we lose our bridge to carry us to mass adoption.
