

May 22 - June 5

Hi everyone! This is our next installment of Enigma's community updates. Our goal is to be as transparent and collaborative as possible, and we appreciate all your insights and perspectives. Below is a summary of what we have been doing since [Friday, May 22](#). You may review our current sprint (ending June 7) documented on this [GitHub project board](#).

Highlight: [Secret Network Development Update ~ May 2020](#)

Summary

Enigma's dev team has made significant progress toward achieving [milestone 3 of 3](#) on the path to enabling secret contracts on [Secret Network](#), which means compiling and running a full node with [wasmi](#) inside [SGX](#) with encryption abilities. All basic functionality for executing [CosmWasm](#) contracts in a secure enclave is now implemented and continues to be tested! The compute

module is almost ready for public testing, and we are looking forward to exploring the many use cases for secret contracts! Keep an eye out for improvements to this evolving documentation, and let us know any feedback.

[build.scrt.network](#)

Lately, our team has been focused on the cryptography elements of the secret protocol. This means encrypted inputs, outputs and state. We'd appreciate any feedback on our new documentation of Secret Network's [encryption specifications](#)!

Our community is planning an incentivized test called the Secret Games, involving SCRT rewards for testnet validators who have nodes equipped with Intel SGX, along with rewards for developers and other members of the community. [Join the conversation](#) happening in our RocketChat, and stay tuned for detailed updates! In the meantime, you can fill out [this form](#) to indicate your interest.

Most Referred Topics

- [Don't trust, verify \(an untrusted host\)](#)
- [Discussion: Community funds / inflation in Secret network after secret contracts](#)
- [An update on the encryption protocol](#)
- [Why the Cosmos move doesn't mean we're leaving Ethereum](#)
- [Secret Contracts on Enigma Blockchain](#)

Community Participation

Enigma Governance Working Group

Next meeting: 2020-06-12T18:00:00Z

This week, we mostly discussed learnings from the Cosmos Governance Working Group. I believe our common goal is to maximize participation and empower all kinds of stakeholders. Secret Hub and Cosmos are greater than the sum of their zones. Apparently, the meta question is what kinds of proposals are in the scope of the Secret Hub.

Everyone is welcome to share any thoughts in our weekly calls. Your feedback is extremely valuable to us, and Enigma's core team is grateful for your contributions! Please let us know if you need help submitting a proposal using our on-chain governance module.
