

Personal Information

Discourse ID: [@TheFatherOfAllStorms](#)

Twitter: <https://twitter.com/DuquePawlovsky>

Country of Residence: United States & Spain

Educational Background:

Finance, Microsoft Certification Program for Developers(USA, Microsoft), Medical University, athletic training & sport studies, International Relationships (Spain), Design Courses, Apple Official University (provided by my job at Apple Inc for 5 years & additional technical certifications), DEFI research studies & development provided by different blockchain associations & official Clubs from different chain, different blockchain official bootcamps for developers.

Professional Background and Relevant Experience:

Athlete, sold Design Company, held red level clearance in the EU for 5 years for international work in Spain that required special Airport access/communications with relevant entities & International contracts for major sport clubs in Football, Golf, Basketballs & other sports plus special packages for "very important people".

Financial education, fraud prevention education, Microsoft certified Developer, Apple Certified Escalation technician Corporate International department & AMR, before Genius Bar escalation Technician, set up specialist for new products & Apps testing before public or companywide launch, Fraud prevention escalation department, Joint Venture priority support, International Relationships studies in multiple languages, certified sport academies, design studies, trading courses.

DEFI relevant studies, WEB3 developer bootcamps provided by different blockchains and WEB3 associations, tested WEB3 games & DEFI apps looking for braking point & this way helping in improving them. Constantly doing research in WEB3, including and now limited to new layers & chains zero. I was a Speaker at major blockchain/NFT conferences. first ever person to launch collections for sale in Apecoin. Build in VR and deploy 3D & mixed art renders on my own contract & platforms as NFTs.

Nomination Statement:

My goal is to have more opportunity with dedicated time to keep helping our ApeCoin DAO. As most already know I was a part of it from the day of foundation & became original WG0 steward, which was a continues volunteering position for a while.

On a side I dedicated a lot of time to go deeper into WEB3 reserch, early DEFI platform testing & helper with development for projects & decentralised organisations, part of various cryptography association & white papers documentation. My passion for the ApeCoin extends way beyond social media applications & platforms. I believe in actual utility and real world applicable cases for it. That is why i was always advocating for its usage & onboarding developers for its use. On top supported the testing WEB3 & WEB2.5 applications that can or already are using Apecoin, including gaming & DEFI Apps development direction. Truly see big opportunities and the bright future in this. Also it is incredible to see how many folks becoming a part of the ecosystem, without owning YugaLabs NFTs or any non fungibles. You all are truly inspiring. You give me force to keep working & fighting for our rights to be a big part of WEB3 development & tangible real world ecosystems expansion. So i I am asking for a chance to become your official representative out there & proudly advocate for all of us in official capacity for any Online forum, WEB3 event or blockchain association meetings. Thank you.

Motivation, Vision & Goals:

Holders are the biggest motivation & what all holders want. All voices should be heard. You give me courage to keep going. The Apecoin token itself its like a light in the darkness of many coins out there. I see undeniable force of this community.

Besides advocating strong for the Apecoin I envision it's more broad implementation for the real world possibilities, making more visible for all folks beyond Twitter. Make it more visible with more personable approach for different type of communities & groups by aligning with their needs and possible WEB3 & WEB2.5 integration of the Apecoin. More cross-community connections forming. More representation of our voices and what we looking forward too. elevating Apecoiners in their pro-apecoin goals.

The important thing is not what i wish but what all you wish, because i will be working for you and not for me. Its all about what we all want to archive and I am here to listen, help & represent us and not to dictate any personal wishes/goals. Apecoiners are in charge to dictate agenda & needed achievements - no doubt about it, and im here to work with you.

Values & Commitment:

This question asking about working group steward. I already been a WG0 for long time donating my efforts) Now I applied for Council position to keep sharing my knowledge and relevant experience to help others. Keep elevating the DAO and give accurate information on ApeCoin Token is beyond crucial. I have been committed to our DAO from day zero & spread a good word about opportunities.

I know that the position only requires a part time commitment . But lets be honest - you need some time more then 8 h a day and many days a week, specially when you participating in huge conferences and a lot of side events like Consensus (will be all week there and almost no sleep), ETHDENVER (official speaker), ETHTORONTO+BLOCKCHAIN conference+Hackathon+NFTconference (participant this August), online developer events that last 2 weeks man y hours a day, MIT Bitcoin expo and side events for different chains & developer events all week, Harvard blockchain conference and side events with many by invite only for developers, and some popular options that should not be slept on, Miami events, EU events, APAC region events & online activation opportunities for us, NFT NYC (speaker) plus side events, ApeFest plus side events, Blockchain accelerators across the world events - this is just some examples and never stoping WEB3 where I've been and active participant or representative, and all post meeting plus calls after those. When it's needed - the commitment goes beyond minimum time no doubt!

At the end the code values are human values and be truthful to yourself and the the values holders are align with.

Concluding Statement:

I give power to people. Apecoiners are the decision makers. I here to listen you and elevate pro-apecoin initiatives. Ape Read and all Apecoiners read, brainstorm, think and decide.

I feel alignment with many different groups and cultures, different individuals because of my different and educational backgrounds and work experiences in different regions of the world. I speak multiple native languages as many of you know. Spend my childhood and young age growing up in western Europe, Lived in South East of Asia and Oceanic Central Region, I am a Spaniard that lives and worked for about half life in USA and during pandemic I supported international regions. The accident couple years ago, when i was hit by a car, although is was very traumatic at the end really gave me more opportunity to go even deeper into DEFI & WEB3 research aside from full IP NFTs and opportunities with them. And thanks to BAYC little and only humble mutant NFT i was able to become an OG here in my first decentralised organisation, that brought so much passion to the space in it's core. I can never let go of this feeling and want more people feel this sensation.

At educational background I have couple universities behind my back, Certified Microsoft and Apple developer plus technical computer studies, finance & design coursed, athlete academies & languages. A lot of WEB3 developer bootcamps, different blockchain reserch and early adopter for WEB3 platforms, love testing WEB3 Apps/platforms and games and developing companies direction. Free time Love to do VR & 3D design with mixed art NFTs.

My bigger free time I love to do outside sports like freeride snowboarding (was an official sponsored athlete by many brands, competed too) and , golf, tennis, some water sports; while finishing physical therapy had to slow down, so dedicated more time to go to Blockchain conferences and relevant events besides e-gaming can be a sport as well.

Thank you for your consideration, I can't wait for a chance to give back more.
