

CBC-Casper aka Vlad's Casper is the separate research being done on transitioning Ethereum to a Proof-of-Stake blockchain. Since the announcement several weeks ago about combining FFG Casper and Sharding research efforts in order to transition Ethereum to a PoS blockchain, there has been no mention of CBC-Casper.

Is CBC-Casper still an ongoing research project for the Ethereum Foundation?

If so, how will it be integrated, if at all, into the new direction of the Ethereum ecosystem?
