## **Shade Protocol Airdrop for \$ATOM and \$SCRT Stakers**

Greetings to all Citadel.one users and delegators!

Reading time: 4 min read

So WHERE EXACTLY are those tokens/coins coming to if I have staked my SCRT? My wallet? So WHERE EXACTLY can I see the \$SILK and \$SHADE tokens (in my Keplr wallet for example or where) and use them? My wallet? Where there exactly?

I think the whole news is very vague and no pages that I can find explain ANY OF THIS. Yes, there are some SILK and SHADE “things” that are really supercool...but nobody, literally, nobody, nowhere explains WHERE EXACTLY ARE THEY VISIBLE/USABLE!?! I have spend quite a lot of time trying to figure it out and no, no information about the subject can be found anywhere in the net.
