

import DocCardList from '@theme/DocCardList';

Each of the pages in this section describes one of the ways in which SUAVE extends Solidity and gives you, a MEV application developer, unique advantages.

In brief, SUAVE enables you to:

- Build blocks on other chains
- Define private compute
- ♀ Store private data
- Interface with many different MEV components, meaning that you can
 - ⚡ Plug into existing MEV infra: i.e sending bundles to block builders, relays, validators or sequencers
 - Build totally new MEV infra: i.e. create unique SUAPPs on SUAVE
