

Network Switcher for Dapps

The `wallet_switchStarknetChain` can be used by dapps to request that the wallet switches its active Starknet Network.

Params

1. `SwitchStarknetChainParameter` (required)

`chainId` (required)

MUST specify the integer ID of the chain as a short string.

...

Copy `'SN_MAIN' || 'SN_GOERLI'`

...

Example

Request

...

Copy `await window.starknet.request({ type: "wallet_switchStarknetChain", params: { chainId: "SN_MAIN" } });`

...

Result

...

Copy `"null"`

...
