My values:

- Skepticism

: I like to start with that one because even though it doesn't define my platform, I think it sets me apart. Enough years in this industry has taught me that believing blindly leads to catastrophes.

- Neutrality

: I don't work for anyone, I don't have any other interests than those of the communities I serve as a delegate.

- Focus

: Too often, the attitude of ecosystem funds is spray and pray. This leads to bad teams applying en masse and great teams being discouraged. Money isn't a giant hammer that makes problem go away, though it certainly helps.

- Availability

: My twitter is right there, my DMs are open, if you've delegated to me please reach out and ask me the hard questions.
