

I like this idea and I'm willing to give it a shot tomorrow. As stated [before](#) I thought about making a video tutorial on how to lend/borrow NMR; I think I'll do that and accompany it with a written summary?

In regards to Requests for Proposals; I think these should just be called bounties. At least that's a common way I see other DAOs do it. If more ideas for tasks such as this one exist, it could even be worth it to set up a channel (#bounties

, #contribute

?) for it on RocketChat. And indeed escrowing is then overkill, communicating about it here on the forum and/or RocketChat should be sufficient.
