

Future Proof

✧✧ The Future-Proofing Evolution

SyncSwap features powerful multi-pool technology, opening up a whole new future of Seamless and Efficient Trading on zkSync Era ■.

The multi-pool allows SyncSwap to aggregate multiple different pool models, each with its own optimal scenarios, making trading highly efficient. The first pool model to land will be the Stable Pool supports efficient stablecoin trading compared with the general-purpose Classic Pool, making SyncSwap enter the massive stablecoin markets.

As a member of the forefront of the crypto world, we made future-proofing one of our core ideas when building SyncSwap. Multi-pool is a next-generation design towards the future. Unlike designs that are conservative to change, multi-pool is infinitely scalable and will become more powerful as the model expands over time.
