

Aave's Polygon Market has seen incredible growth with an emphasis on being available to everyone with cheaper transactions. Let's keep this going.

These tokens exist abundantly or are being emitted on the Polygon Network via rewards from their respected protocols. They are currently listed on the V2 Market so I'm curious if it would be pretty straightforward to add the following to the Polygon Market:

- BAL (<https://polygon.balancer.fi/>)
- CRV (<https://polygon.curve.fi/>)
- SUSHI (<https://app.sushi.com/>)
- LINK ([Chainlink VRF Contract Addresses | Chainlink Documentation](#))
- DPI
- dQUICK (staked QUICK)

Here is the Snapshot vote to gauge interest:

[Snapshot: Add assets to Polygon market](#)
