- [MoonPay](#)

On & Off-ramp

On & off ramp enable users to convert between fiat currencies and cryptocurrencies.

Monerium

[Monerium](#) enables sending and receiving euros between any bank account and Web3 wallets with Monerium's EURE stablecoin, bridging traditional and decentralized finance for your L2

Monerium is live with:

EURE Stablecoin: Fully authorized, overcollateralized onchain euro token, easily manageable and exchangeable on major DeFi platform

EUR Transfers: Monerium's web3 IBAN allows for euro transactions between bank accounts and web3 wallets

Payment API: Offer services for account management, payment processing, and automated fiat transactions.

MoonPay

[MoonPay](#) facilitates the buying and selling of cryptocurrencies and NFTs using traditional payment methods such as cards and bank transfers for your L2.

MoonPay is live with:

Off/On ramp: Seamlessly convert traditional money into cryptocurrencies and vice versa with onramp and offramp services.

Swap: Enable users to swap crypto across different chains while benefiting from low transaction fees.

Checkout: Provides a seamless buying experience for brands, creators, and marketplaces, enabling users to purchase NFTs and Web3 Digital Goods with credit or debit cards. [Previous Account Abstraction Next Community](#) Last updated 10 months ago
