

Just an idea. What if we will create our own NFT marketplace that will be governed via a separated from ApeCoin DAO with it's own token?

The token will be airdropped to OpenSea and LooksRare traders, Snapshot voters, and BAYC/MAYC/Otherdeed holders. Thus we will acquire nice audience fast, and there will be not only NFT traders, but also experienced DAO enthusiasts. And of course holders of our core NFTs.

Killer feature: All trades done via \$APE token will go with just 0% fee.
