

Developers

Role

The role of Developers in the Lava Network:

- consume APIs on the network via the Lava Gateway
- making contributions by maintaining and developing specifications for new blockchains and APIs
- writing code or debugging issues that contributes to the Lava blockchain (based in CosmosSDK)
- building dApps and platforms which use LavaSDK or ServerKit (RPCConsumer
-)

Use-Cases

App Type Intention Recommended Interface Front-End building a dApp, smart contract, or NFT project [Lava Gateway](#) , [Lava SDK](#) Back-End creating microservices, clients, daemons, or tooling [Lava SDK](#) or [Server Kit](#) Gateway / Portal self-hosting a centralized point for high throughput Lava P2P network access [Server Kit](#)

Quick Start

Gateway
