France

Professional Background:

I have 10+ years of experience in Digital communication and design. I worked for both in the Public and Private sector in highly regulated environment. I have been working as a Digital Solutions Expert for the past 3 years in the financial industry before leaving to focus on Web3 in June 2022. I'm now developing my own family friendly NFT project called The Nanoz.

I have 10+ years of experience in Digital communication and design. I worked for both in the Public and Private sector in highly regulated environment. I have been working as a Digital Solutions Expert for the past 3 years in the financial industry before leaving to focus on Web3 in June 2022. I'm now developing my own family friendly NFT project called The Nanoz.

Nomination Statement

I'm running for the Special Council to help drive ApeCoin adoption and DAO participation. I want to be the voice from overseas and contribute to make ApeCoin the coin of Web3 and not only the « Coin of the Apes » as it is way too often misunderstood.

Motivation

Ever since ApeCoin was launched, I've been a big believer of its potential to be the economic backbone of Web3 and would love to help reach this goal.

My three main focus will be Community, Transparency and Awareness. I do believe these pillars are key in driving the adoption of ApeCoin beyond the Yuga ecosystem. Furthermore, I want to make sure people have a clear understanding of the activities of the Special Council.

Finally, it's important for me to be the voice of the European Community.

Rationale

For the past 10 years, I've been working in both the public and private sector in highly regulated environments and under NDAs. I have experience in managing budgets, lead and develop projects and processes while maintaining brand integrity.

I also participate to many events and conferences in Europe where I would love to educate people on the ApeCoin DAO and ApeCoin.

Specifications

Since July 2021, I lead a family-friendly NFT project called The Nanoz. My main focus is to provide a transparent and fair experience to holders. I recently launched the Snapshot space allowing holders to vote on Roadmap activations as a first step to a decentralized governance for the project. I'm also a member of the PV Founder's DAO.

My goal is to improve communications between Special Council and the community (through weekly spaces, threads, Q&A), being in touch with local communities, participating to both online and IRL events presenting the DAO and its purpose.

Concluding Statement

I'm an easy going and passionate person. I'm transparent and have a deep sense of responsibility. I breath Web3 and I'm now full time focused on the space with a large amount of time to dedicate to the Special Council. I don't take this role lightly and will be devoted to my mission.
