

Hello.

On January 21, 2024, after logging in my metamask wallet to the link from twitter / I wanted to find out if I am entitled to the vairdrop of the "Dymension" project, the given link was on the official twitter account of the given project/, as soon as I connected the wallet there and started the chain Arbithrum all my ARB tokens have disappeared from my wallet. I can't see any transaction or transfer data there. I can send a scan of the transaction to etherscan .io Is it possible to help me with this? Is it possible to return the stolen Arb coins back to the wallet? thanks in advance for your reply
