Hello dYdX Chain Community,

We're thrilled to announce that Leap Wallet is now fully integrated with the dYdX Chain!

[Leap Wallet](#) is a non-custodial wallet designed to simplify your dYdX chain experience. With its user-friendly interface, Leap Wallet lets you seamlessly manage your dYdX assets. You can view your dYdX chain portfolio, transfer assets, stake \$DYDX, vote on governance proposals and track your transaction history all in one place.

You can [get Leap Wallet](#) as an iOS or Android mobile app; and as a browser extension on Chrome, Edge or Brave and as web dashboard.

Bridging & Staking \$DYDX token

If you are a \$DYDX token holder on Ethereum, one of the most important things you can do currently on dYdX chain is bridging your \$DYDX tokens to the new dYdX chain and staking them. But, this process might seem daunting for the first time dYdX chain users, and this is precisely why we have built the simplest \$DYDX bridging & staking experience on our [dashboard](#) with a detailed step-by-step guide assisting you along the way.

Bridging \$DYDX from Ethereum to dYdX chain effortlessly on Leap Dashboard

Head to the [Leap dYdX dashboard](#) and follow the easy steps shown on screen to bridge your \$DYDX from Ethereum to dYdX chain as shown in this video guide: <https://www.youtube.com/watch?v=k5th7MeZczY>

Staking \$DYDX on Leap Wallet Extension & Mobile apps

[

](https://www.youtube.com/watch?v=k5th7MeZczY)

If you have Leap Wallet extension or mobile apps installed, you can stake your \$DYDX tokens right from within the wallet, through the staking page.

If you wish to redelegate staked assets to another validator, you can simply switch validators without having to unstake. We've also made unstaking just as easy.

Moreover, if you have our mobile app installed, you receive a notification whenever you stake or unstake your tokens.

Leap Wallet Validator

We are all-in on the dYdX chain and as proof of our commitment, we are also operating a validator and helping secure the dYdX chain. Consider delegating to Leap Wallet Validator and give us your support.

Security

Leap is a non-custodial wallet, and we have no access to the keys that control users' funds. Our codebase has been audited by reputed security firms like Halborn, Sayfer, & SCV. All security reports can be read [here](#). Our codebase is open source and [accessible here](#).

Use Ledger to stake your \$DYDX tokens

For an additional layer of security, users can connect their Ledger hardware wallet to Leap.

Users can either create a new hot wallet or connect their Ledger directly. The process is smooth, safe, and secure — combining the extra security of hardware devices with the convenience & intuitiveness of the Leap experience.

Very soon, you'll be able to connect your Ledger to Leap through Bluetooth on mobile as well!

Looking forward!

We have some exciting new features are on the horizon for dYdX chain, and we'd appreciate hearing your ideas. Your support is important to us, and we look forward to serving the community in the best way possible.

Best regards,

The Leap Wallet Team
