

We have just deployed our vote to be added to Lido's oracle member committee! To provide some color on our background, we are currently one of the node operators of Lido and we have been one of the longest node operators of Chainlink. We believe we have what it takes to competently run an oracle to ensure all stETH holders can receive an accurate reward amount from staking on the Beacon Chain.

Please vote for us to be added to the oracle member committee! Can't wait to see stETH being adopted more actively by the ecosystem!
