

We've launched a new feature enabling delegates with significant voting power to endorse others who, despite their valuable contributions, hold less voting power. This aims to address the issue of voting power concentration among a limited number of delegates.

If you are a delegate with large VP, please consider endorsing a few less visible delegates. All the endorsements are stored onchain. They are [attestations](#) utilizing Ethereum Attestation Service.

You can endorse by finding a delegate here <https://arbitrum.karmahq.xyz/> and then clicking Endorse button on their profile.

](<https://global.discourse-cdn.com/standard17/uploads/arbitrum1/original/2X/8/860f69966d00dd007912eb7ad332dd62bd357c6f.png>)

When a token holder is looking to delegate their tokens, we nudge them to delegate instead to endorsees.
