

AIP Name:

[AIP-22: Staking Pool Allocation Reloaded - Ecosystem Fund Allocation](#)

Implementation Status:

Complete

Author:

[@giacolmo.eth](#)

Abstract Summary:

Coherently with AIP-21 Staking Process with Caps (1x drop), this AIP wishes to simplify and move forward, effectively proposing again the previous AIP-5, which was voted against uniquely for the absence of caps in the Staking Process.

This proposal presents the total ApeCoin allocation for the staking pools and the three-year duration of this staking period.

Overall Cost:

As the development of the staking contract is complete prior to this AIP becoming active, the deployment of the ApeCoin isn't an additional cost. This is presenting the pool to be utilized only.
