

Anyone up to speed please tell me what's going on:

A) What happens to unswapped ERC20 ENG tokens?

There are no active markets for SCRT:

B) Why would I swap ENG for SCRT, if I can't even sell it?

C) Are any exchanges participating in the swap?

D) Is the SCRT on the mainnet?

E) Are there deadlines for this swap?

Some in the know, please clarify what is going on with this swap.

Thanks
