

AD Recognition Submission Feedblack Loops (FBL) EA Address: 0x25578C179f8c4c15921457DE61596A1823541BE2
[Delegate Contract 1 address: 0xC678783729724364BDDCf76950D53503b0AbcA11] : [Following Composable CVC]
[Delegate Contract Contract 2 address: 0x04fa224217a37E216698EDcB404380B52E4f7454] : [Following Growth CVC]
[Cryptographically signed CD Recognition Submission Message from the Ethereum address controlling Delegation Contract 1] : <https://etherscan.io/tx/0xd847a6115d3531bb595d1fb7cde054ad0fba50b17147f30b7892e4ee830d6ef0> [Cryptographically signed CD Recognition Submission Message from the Ethereum address controlling Delegation Contract 2] : <https://etherscan.io/tx/0x1cf9e650fde4b4d1de071632e464410bd873e9c46bb08440862323239aac5f12> [Cryptographically signed CD Recognition Submission Message from the Ecosystem Actor Ethereum address, where this address is not one of the addresses controlling a Delegation Contract] : <https://etherscan.io/verifySig/16787>

FBL continues under endgame, applying as a CD/AD under MIP113 5.2. We're pleased to continue to provide value to the Maker ecosystem as we transition through the Endgame and beyond. We're going to follow the Composable and growth CVC's officially, as per signatures.

You might have noticed a fresh account in more than one location, that's simply because this platform is set up to align for more participants and hardened security practices. This Governance account will correspond to a similar email but has been launched as a shared resource.

Not only will we attend the chosen strategies meetings, but providing value to other CVCs is important. Especially in this early stage, tightening operations and reducing misalignment is crucial. Looking forward to the future.
