

Creating a Pool Tutorial

Create a pool

1. SelectLiquidity
2. at the top of the main screen.
3. With the Explorer tab active click on+Create a pool
4. .
5. Read the explanation in theCreate a pool
6. modal, and then selectGet started
7. .
8. EnterToken A
9. using its label, symbol or mint address, then repeat forToken B
10. .
11. (Optional) if you have not already done so selectConnect wallet
12. .
13. SelectContinue to next step
14. .
15. Carefully set initial deposit parameters.
16. Note: these parameters are critical to how your pool will operate.
17. Pool fee rates are analogous to a spread in a traditional orderbook: a 0.30% fee rate equates to a 60 bps spread for traders. Different fee tiers are useful for market makers during varying levels of market volatility.
18. Please do your research and swim carefully when creating your pool.
19. When you are ready selectPreview
20. .
21. Review details of your pool carefully.
22. Warning: high transaction fees: creating a pool uses a lot of space on the blockchain. Solana network fees will be higher than for standard transactions.
23. SelectCreate pool
24. and deposit, review and approve in your wallet: this transaction creates your pool.
25. A second transaction is needed to deposit to the pool, review and approve in your wallet.
26. That's it! Your pool is live!
27. Note: you can find links in the modal to your pool, but new pools may take up to 10 minutes to appear in the explorer.
28. (Optional) selectAdd token to the Orca Token List
29. if you wish to add a token to Orca's token list - this will open a form on which you can submit a request. Please see[How to add a token to the Orca Token List](#)
30. and/or[How to add rewards to a pool](#)
31. .
32. .
