

Hi,

I have problem when I want to repay my debt. I borrowed USDT on Polygon Market V3 and used POL as collateral. Now I want to repay USDT, but I cant. I tried repay by using collateral, by using USDT in my wallet. In fact I i tried to withdaw collateral, supply more POL or USDT nothing works. It looks like transaction executed but it's only a fee.

I'm using ledger wallet.

What is wrong?

Thank you!
