

# Restricted Territories

Due to regulatory concerns, Maverick Protocol has implemented geo-restrictions on platform use. Users who are swapping, providing liquidity, or performing other actions using an IP address within the United States and/or Sanctioned Countries are, at this time, not eligible for participation in these programs.

If you believe that you are trying to use Maverick services from a country where they are not restricted and are encountering geo-restrictions in error, please contact us on [Discord](#).
