

Hey folks, I'm looking to put my AAVE to work and I'm looking into the various places where I could do that.

So far I found:

<https://app.aave.com/staking> - 7.2% APR in AAVE (comes with cooldown period I assume)

<https://app.aave.com/deposit> - on Aave's Matic Network Market - APR is 16.64% in MATIC

<https://app.bancor.network/eth/data> - on bancor (single sided available) - APR is 13.54% in AAVE + 7.14% in BNT

<https://zapper.fi/farm> - shows various pools on SushiSwap, Balancer and Uniswap but I'm not so keen on providing pairs because of the IL risk (I want to "really" be passive)

I would appreciate more pointers on putting my AAVE tokens to work.
