

## The Infinite Garden Stage

18:30-19:00

Our Ethereum Journey with Jinglan Wang, Karl Fleurbach, Ben Jones, Phil Daian and Vitamin, navigated by TINA

19:00-19:15

Live Musical Performance by Georgios K and Ben Jones

## The Sidecars Stage

Turbocharge Ethereum Decentralization with Programmable Privacy

19:30-21:30

Speedruning the Ethereum roadmap towards decentralization... with Vitalik, Barnabe, Alex Stokes, Julian Ma, Christoph Schlegel

State of Programmable Privacy: TEE x ZK x FHE x MPC reconciliation, with Mikerah

What if we have trustless TEEs and magic cryptography today, what type of applications can we unlock?

21:30-22:00

Panel | Contradictions All the Way Down with

Michelle Lai (privacy advocate), Quintus Kilbourn (Flashbots), Julio Linares (Poetic Technologies), Phil Daian (Flashbots), Christopher Goes (Anoma)

- In recent times, technologies promising decentralisation and freedom have been co-opted by existing power structures. How can we learn from history and avoid repeating the same mistakes again? How can we ensure that building the future of confidential computation and privacy-preserving communication remains genuinely in the hands of the communities it aims to serve?

In this panel, we examine the contradictions in proprietary confidential computation technology and explore how mechanism design can ensure community graph data is computed efficiently and privately by design.
