

I have sent out an invite to schedule our first recurring call as a group to discuss research topics.

November 19th @ 16:00 UTC (<https://www.worldtimebuddy.com/mst-to-utc-converter?qm=1&lid=7,100,2759794&h=7&date=2019-11-12&sln=9-10.5>)

This is 2 hours later than the normal AllCoreDevs call on Fridays. If doing it at the normal ACD call time of 14:00 UTC would be better/worse please let me know.

If you wish to attend the call and did not receive a calendar invite send me your email address and I'll get you added.

If you have an agenda topic you would like to discuss, please reply here as well.

The primary agenda item I'll be covering myself is the plan for migrating Eth 1.x to a 2.0 execution environment outlined here: <https://notes.ethereum.org/cISMnGRMR6-EWka8QLLIYw>
