### About Us

Today in DeFi Research is a DeFi Research team focused on HNWLs, DAOs and institutions. We do farming research, governance, project analysis, sector analysis and other fundamental research to inform treasury, portfolio management, and governance decisions.

We are the research arm of Today in DeFi, a DeFi news media.

#### Our goals as Arbitrum Delegates

We aim to help Arbitrum DAO operate more effectively while retaining decentralized values. Our goals as delegates are:

- Decentralization - we think Arbitrum's strongest value prop is its credible neutrality and decentralized values
- DAO efficiency - Decentralization often makes organizations slower, so we want to do our best to govern in a way that keeps Arbitrum DAO as efficient as possible.
- Effective use of funds - As ARB holders we are invested in the success of Arbitrum and want to govern in a way that uses ARB and its treasury as effectively as possible with minimal waste.
- Transparency - Large organizations often have issues with transparency. As a news organization we have the ability to track information well and hope to use that to help Arbitrum DAO.

### Disclosure

We currently do not have any conflicts of interest, but will disclose them here as they arise.
