

Friends,

I'm a newbie and in search of some help/guidance on how to migrate from v1 to v3.

If this is not possible, how to migrate from v1 to v2 first, and then to v3?

My Aave tokens are on the Ethereum network:

[Ethereum \(ETH\) Blockchain Explorer](#)

[Ethereum Transaction Hash \(Txhash\) Details | Etherscan](#)

Ethereum (ETH) detailed transaction info for txhash
0x1e40c6eda231311e895428bfb76fef5f939d061eb88f5f0afb46d3418be990f2. The transaction status, block confirmation, gas fee, Ether (ETH), and token transfer are shown.

Any guidance immensely appreciated.

Joe
