

Orca on Solana for New Token Creators

Orca empowers token creators (and others) to permissionlessly create pools for their tokens.

In the following section, you will find a range of helpful how-to guides for using the permissionless token listing tool, as well as other steps for improving your token holders' experience.

If you are unsure about any part of this process, please reach out to Orca for support. If you do not have an existing channel of communication with Orca, please open a ticket by using the Support function in the wallet menu, or on [Orca's Discord](#), or [Orca's Telegram](#).
