

Hi Guys,

I'm bit confused on how things are going on Enigma.

First of all, is Enigma out of money? I'm referring of ico funding, as we know we raise 45M in 2017 and I would like to know, who is the legal entity who raised money and how is current financial situation.

Because is not clear to me, why Enigma need a community tax of 75% for funding a Swap Procedure that cost around 450k SCRT (around 55k if we consider SCRT price as ENG price).

Thank's all
