

The discord or discussion forum should have more features, such as the ability to upvote or downvote posts, the ability to follow specific topics or users, and the ability to see which posts are trending. Adding these features would make the forum more interactive and engaging for users.

The forum could be improved by adding more resources for users, such as;

- Adding a FAQ section that answers common questions about Apecoin and the forum.
- Creating a “Getting Started” guide that walks new users through the basics of using the forum.
- Adding a “Tips and Tricks” section that shares helpful information about using the forum and interacting with other users.
- Hosting regular Q&A sessions with members of the Apecoin team.
- Having a “Monthly Recap” section that highlights the most popular topics and posts from the previous month.
- Adding a “Did You Know?” section that shares interesting facts and trivia about Apecoin and the blockchain.
- Creating a “Creator Spotlight” section that highlights the work of artists and creators who are using Apecoin.
- Organizing weekly or monthly challenges for users to participate in, such as trivia contests, art contests, or quizzes.
- Adding polls to the forum so that users can vote on different topics and issues related to Apecoin.
- Having a “Resources” section with links to helpful information and resources related to Apecoin and the blockchain.
- Setting up a “Leaderboard” that tracks users’ activity on the forum, including posts, likes, and upvotes.
