Draft Date: 2024-01-27.

Published date: 2024-03-27

Summary:

DAOplomats are seeking community support to enable isolated borrowing for EURE, a Euro-backed stablecoin from Monerium on Gnosis V3.

Motivation.

The gnosis market supports EURE - Monerium Emoney, but the asset cannot be used as collateral.

EURE usage has significantly increased over the past few months due to its recent integrations within the Gnosis ecosystem and Request Network. Even though EURE is the ideal asset to borrow due to its E-money status, the relative lack of usage of EURE can be explained by the inability to use it as collateral and the Gated Monerium ecosystem.

However, considering the relative number of EURE holders and the TVL on the gnosis V3 market, the community should have an open discussion to enable it as collateral.

Source: [Dune.com/arni](https://dune.com/arni)

Since January 2024, EURE has had a total volume of over € 232,493,601, capturing more than 52% of the total on-chain Euro stable coin volume.
