

Change the url from [Proposals](#) to

proposals.apecoin.com

As people looking to read proposals may have no interest in delegates or delegation in general. FYI clicking on proposals just sends you to the snapshot. So the display of proposal information in two places not in one menu area is a bit messy and confusing.

FYI it could also be aip.apecoin.com the URL choice can discuss in the idea phase. Please vote for your preferred option:

- proposals.apecoin.com
- aip.apecoin.com

voters

Do people prefer plural vs singular grammar, aip vs aips?

FYI I can't change the poll after 5 mins, so we are voting on principal or proposals vs aips. Not on the grammar of s or no s.
