

Deploy your L2 Chain

Gelato makes L2 chain deployments easy. Our approach focuses on seamless L2 chain deployment, scalability, and integrated blockchain solutions to speed up your time to market with zero infrastructure overhead.

What's not to love?

The Gelato RaaS App is invite-only to set up your custom Gelato L2 testnet.

Testnet & Mainnet Deployment

To launch your custom Gelato L2 testnet, simply follow these steps:

1. Enter a deployment name
2. Select your rollup framework of choice (Polygon CDK or OP Stack)
3. Pick your deployment environment as "Testnet"
4. Add wallet addresses if you need to receive test ETH
5. Once you're ready, click "Deploy" to launch your testnet chain!
- 6.

?

Here's how to get started:

1. Schedule an [exploratory call](#)
2. to discuss your project and how the Gelato team can help.
3. Finalize your L2 configuration, service agreements, and deployment schedules
4. Launch your custom L2 on the mainnet and join other customers like Astar and more.
- 5.
