

Installing CLI & Creating A New Address

secretcli is the Secret Network light client, a command-line interface tool for interacting with nodes running on the Secret Network. To install it, follow these instructions:

Download

Get the latest release of secretcli for your OS [HERE](#) .

Install

- Mac/Windows: Rename it from secretcli-{VERSION}-{OS}
- to secretcli
- or secretcli.exe
- and put it in your path
- Ubuntu/Debian: sudo dpkg -i secret*.deb
-

Setup the executable

Linux and MacOS users:

...

Copy `chmod +x secretcli`

...

Configure

...

Copy secretcli config chain-id pulsar-3 secretcli config output json secretcli config node <https://rpc.pulsar.scrtestnet.com>

...

You can find alternate node endpoints in the [API registry](#) , or run your own [full node](#) \

Check the installation

...

Copy secretcli status

...

...
