[AIP: Empowering Early Contributors: The community Arbiter Proposal 2.0](#)

Summary:

This proposal proposes to allocate 125,000 \$ARB tokens, equal to 0.00125% of the total supply, to recognize and reward the outstanding contributions of the Arbitrum community member known as "Arbiter".

Recommendation: Vote Yes

. Is known that these contributors helped to onboard users during the initial days of Arbitrum being live. We agreed with the allocation amount as the impact was significant on onboarding users and defi projects towards de chain.

[AIP: Expand Tally Support for the Arbitrum DAO](#)

Summary:

proposal to expand Tally support for the Arbitrum DAO by improving the proposal process, upgrading the Governor contracts, and highlighting delegate contributions. Tally also propose to ensure that the DAO is set up for success by researching specifications for partial delegation and shielded voting.

Recommendation: Vote Yes.

Tally can be considered the front-end for onchain voting within the Arb Ecosystem. The proposal is pretty detailed for the improvements they want to develop and from a community perspective, onchain voters feel comfortable using Tally UI. we think this will further enhance the governance voting UX.

[AIP: Request for Continuation of the Arbitrum DDA Program Request](#)

Summary:

proposal to renew the Arbitrum DDA Program with a budget of \$4M for two quarters. The domain allocators will utilize this budget to fund proposals that align with Arbitrum's roadmap.

Recommendation: Vote Yes.

The DDA team are rockstars for running this program with such grit and detailed info on their impact on the Arb Ecosystem. We are voting FOR as we believe they are net positive for the Arb ecosystem and provide a lot of transparency on their funding program that help many projects get started on our network
