

AIP Name:

[AIP-390: ApeCast - An app that supercharges your listening experience for all things ApeCoin \(Resubmission\)](#)

Implementation Status:

Pending

Implementation Date:

N/A

Author:

[@leyota](#)

Abstract Summary:

ApeCast, your app with and audio library full of curated X Spaces and ApeCoin-related recordings! Save time by searching for keywords and listening to specific segments. Read summaries of the audio in the language of your choice for quick overviews. This app will help you catch up on spaces, while not having to listen to the whole thing which can sometimes be 3+ hours!

ApeCast will be released for both iOS and Android.

Overall Cost:

50,000 ApeCoin

Timeline Updates:

03/12/24 :

We are kicking things off officially this week! I'm working with the foundation to get the initial funds released. Other things that are also being worked on:

- Mapping out UX flows and sending them to the designer
- Researching the feasibility of using certain libraries

This week and next week, we will be doing the foundational work to build the app and backend system. We are using the "measure twice cut once" approach since we know the requirements ahead of time.
