

Hey everyone,

I'm Nelson from Techemynt & Techemy Capital in NZ. We are the issuer of the first and only 1:1 backed NZ dollar stablecoin NZDS. → check out our website here: https://www.techemynt.com/#buy_nzds

We also recently launched our Dune Dashboard: [New Zealand Dollar Stablecoin \(NZDS\) Ethereum Analytics](#)

We would like to be a part of the Aave community to help grow NZDS volume on-chain, and provide new cases like single sided liquidity for non-USD based stablecoins.

I'd be happy to prepare a full proposal, but just wanted to jump in here say hi and let the community know what we're about.

Cheers!
