This marks the official charter and intent of the education committee. KPIs are now being actively tracked, and mark the beginning of targeted goals that the education committee lead can now be held accountable for by the community and the committee. As a committee lead I am excited to help push this group to the next level. We have had over 15+ people on many of the education calls, now it is a matter of effectively mobilizing the talent that exists in this ecosystem.

Would love to have your feedback as much time went into getting this first step "right". The way I view it is that we are off to the races after this.

-Carter Woetzel / Education Committee Lead / Secure Secrets
