

eth_feeHistory

Returns historical gas information, allowing you to track trends over time.

For Growth and Custom service plans This JSON-RPC method allows a request to be forwarded to a partner service provider if Infura should experience a service issue or outage. See [Failover protection](#) and [Enable API request forwarding](#) for complete details.

If you would like failover protection but don't qualify under your current plan, then either self-upgrade to the Growth plan or contact a sales representative to upgrade to a Custom plan.

Parameters

- blockCount
- : (integer) Number of blocks in the requested range. Between 1 and 1024 blocks can be requested in a single query. If blocks in the specified block range are not available, then only the fee history for available blocks is returned.
- newestBlock
- : (string) Integer representing the highest number block of the requested range, or one of the string tags latest
- , earliest
- , or pending
- .
- array
- of integers
- : (optional) A monotonically increasing list of percentile values to sample from each block's effective priority fees per gas in ascending order, weighted by gas used.

Returns

- oldestBlock
- : Lowest number block of the returned range expressed as a hexadecimal number.
- baseFeePerGas
- : An array of block base fees per gas, including an extra block value. The extra value is the next block after the newest block in the returned range. Returns zeroes for blocks created before [EIP-1559](#)
- .
- gasUsedRatio
- : An array of block gas used ratios. These are calculated as the ratio of gasUsed
- and gasLimit
- .
- reward
- : An array of effective priority fee per gas data points from a single block. All zeroes are returned if the block is empty.

Example

Replace YOUR-API-KEY with an API key from your [Infura dashboard](#) .

Request

- cURL
- WSS

```
curl https://polygon-mainnet.infura.io/v3/YOUR-API-KEY \-X POST \-H "Content-Type: application/json" \-d '{"id": 1, "jsonrpc": "2.0", "method": "eth_feeHistory", "params": ["0x5", "latest", [20,30]]}' wscat -c wss://polygon-mainnet.infura.io/ws/v3/YOUR-API-KEY -x '{"jsonrpc": "2.0", "method": "eth_feeHistory", "params": ["0x5", "latest", []], "id": 1}'
```

Response

- JSON

```
{ "jsonrpc" :
```

```
"2.0" , "result" :
```

```
{ "baseFeePerGas" :
```

```
[ "0x3da8e7618" , "0x3e1ba3b1b" , "0x3dfd72b90" , "0x3d64eee76" , "0x3d4da2da0" , "0x3ccbcac6b" ] , "gasUsedRatio" :
```

```
[ 0.5290747666666666 , 0.4924045333333333 , 0.4615576 , 0.4940708333333333 , 0.4669053 ] , "oldestBlock" :
```

"0xfab8ac", "reward" :

[["0x59682f00", "0x59682f00"], ["0x59682f00", "0x59682f00"], ["0x3b9aca00", "0x59682f00"], ["0x510b0870",
"0x59682f00"], ["0x3b9aca00", "0x59682f00"]] }, "id" :

0 }
