

Hello!

Just wanted to introduce myself to this here community. I have been fascinated with uniswap for a while and love the idea of having a governance token for a decentralized exchange!

I've been interested in crypto for about a decade buying my first bitcoin for \$5! I love crypto and it never ceases to amaze me, I think its so important for our future. I plan on being active here and using my votes whenever possible! Look forward to chatting with you all.
