

Abstract

Allowing 1/3 of the initial members of the DAO to control a massive portion of the votes was short sighted, thus the initial ape coin claim should of been based on max supply of the NFTS that could solely claim their coins rather than based off floor price. Especially after the Other Side drop in which a huge portion of the mutants initial claim has now been locked, mutants control an abysmally small portion of the vote. By allowing MAYC to claim another 3005 \$APE the balance of power within the DAO will shift to allow mutants to actually participate in a meaningful way.

Motivation

Currently the DAO is failing to generate positivity and has become a source of negativity that will result in a community rift, the general feeling among mutants is that of disappointment and unfairness. If we continue to allow a small portion of members to control the DAO, we as a group have failed to be decentralized. This proposal also rewards BAYC members that held their mutants.

Rationale

It is our collective responsibility to increase the desire for people to participate in governance, currently the sentiment among the majority of mutants is that the DAO is very heavily weighted towards BAYC, because of the initial token allocations it is extremely unlikely that mutants will ever be able to be treated fairly. The votes on AIP-22 show this clearly and if something doesn't change soon, this DAO will alienate many talented people and cause them to be disinterested.

Specifications

All of the technologies here are already at our disposal, it will be simple to allow MAYC to claim an additional 3005\$ APE

Mutant 790, the only MAYC owned by Papasito will be disbarred from this claim to alleviate any and all worries of greed and conflict of interest

Steps to Implement

STEP 1: Draft proposal - complete

STEP 2: Go through 7 day discussion period

STEP 3: Work with moderators to bring the AIP ready to be live

STEP 4: Pass proposal

STEP 5: Give MAYC 30 days to claim their additional APE coin

Timeline

This Proposal should take about 1 month to complete depending on how voters decide.

Overall Costs

A maximum of 60,100,000 Ape Coin, final amount dependent on if all mutants claim or not, coin not claimed within 30 days returns to DAO treasury.
